

OVER **15** YEARS

RECYCLING TECHNOLOGIES FOR CONTAMINATED SOILS

**United Retek**  
Corp.

**Your Brownfield Partner**

United Retek are looking for brownfield properties to develop and innovative partners to work with us.

Our technology is:

- **Brownfield incentive qualifying**
- **Lower overall cost**
- **Reduction of client exposure to PRP issues**
- **In-situ or ex-situ treatments of petroleum, heavy metals and organics**
- **Full recycling certification**

We want to meet with

- **Municipalities**
- **Developers**
- **Contractors**
- **Financial Institutions**
- **Investors**

County Court House prefers the Retek approach

United Retek's technology turns contaminated soil into a reusable product making remediation up to 50% cheaper than traditional means. Projects that lay dormant for years because they are not financially feasible to cleanup, are now viable by applying the "Retek Equation". United Retek is willing to invest time, money, and effort into Brownfield qualifying sites. We are looking for partners to help turn derelict sites into revenue earning properties. Making Massachusetts better for taxpayers and better for the environment.
